

USER MANUAL - LQM7

LOKUKA Bluetooth 5.3 to Aux Receiver

1. Product Description:

LOKUKA USB to 3.5mm Female port Bluetooth audio adapter is a great choice for upgrading old receivers, speakers, and amplifiers to add Bluetooth functionality. Connect this Bluetooth receiver to an aux cord of your amplifier, car stereo, speaker, headphone, or any other audio device, connect the USB port to power the Bluetooth, then connect the Bluetooth "KinMax wireless AUX" on your smartphone. It supports music, hands-free calls, voice navigation, etc.

2. User Guide:

Step 1: Connect 3.5mm to the car "AUX" port or other aux devices, and connect USB a charge port to power the Bluetooth.

Step 2: Active Phone Bluetooth and connect our product "**KinMax Wireless AUX**".

Step 3: Play music on your phone.

3. Warm Tips:

- a. - Please note that the USB port is only for active Bluetooth (NOT for transferring audio as an aux cord).
- b. - If you use this aux female to Bluetooth stereo adapter on an ISO phone when using the mic, we advise that you set the type of device in your phone as "Speaker".
- c. - If the volume is too low when connected to Bluetooth, please click and choose "Sync volume with phone" in your phone's Bluetooth settings.
- d. - Please note that when calling, your sound will be picked up from your phone.
- e. - For first-time setup, pair two phones one by one. Press the USB button once to disconnect the first before pairing the second.
- f. - The blue light flashes when it's USB-powered and stops flashing when the Bluetooth connects successfully.
